

Vaibhav Ambastha

Computer Engineering Student at UBC
Email: vaibhav.ambastha@gmail.com

LinkedIn: [linkedin.com/in/vambastha/](https://www.linkedin.com/in/vambastha/)
Website: vaibhav.github.io/personal-website/

TECHNICAL SKILLS

Programming: C/C++ | Python | HTML/CSS | Java | MATLAB | System Verilog | ARM Assembly | Arduino | FPGA

Software Programs: GitHub | VS Code IDE | IntelliJ IDEA | ModelSim | Intel Quartus | Microsoft Office

EDUCATION

University of British Columbia | Engineering
Bachelor of Applied Science

Vancouver, BC

Expected Graduation: May 2026

- Specialisation – Computer Engineering.
- Cumulative GPA – 3.87/4.33

TECHNICAL WORK EXPERIENCE

UBC Geering Up Engineering Outreach
Offsite Camps Instructor

Surrey, BC

Jun 2023 – Sep 2023

- Proficiently taught a range of programming languages and tools, including Python, JavaScript, and HTML, while adapting instruction to different age groups and skill levels.
- Facilitated hands-on coding projects, enabling students to create functional web applications, games, and software, enhancing their practical coding skills.
- Collaborated with camp organizers to improve the coding curriculum and develop adaptive learning materials.

TECHNICAL PROJECTS

IoT Data Analytics & Concurrent Client Handling Server

Dec 2023

- Developed Java program to simulate an IoT analytics sever which received sensor data and provided various services to clients such as notification, aggregation, and predictive modelling.
- Handled concurrent clients through efficient implementation of server socket programming while ensuring QoS.
- Launched AWS Lambda to strengthen server networks, optimize event handling, and develop predictive services.

RISC Machine (ARM)

Nov 2023 – Dec 2023

- Assembled a RISC Machine implementing synthesizable Verilog HDL to maximize speed on the five-stage pipelined processor.
- Implemented range of instructions to optimize instruction executions through the processor and tested architecture through generating exhaustive Verilog testbenches in ModelSim.
- Improved CPU to process ARMv7 instructions such as LDR, ADD, CMP within 15 cycles and presented instructions on De1-SoC FPGA.

Personal Website

Nov 2023

- Developed personal website using HTML for structuring, CSS for styling, and JavaScript for interactive elements.
- Ensured responsive design adapting seamlessly to various devices and screen sizes for optimal user experience.
- Designed website with a minimalistic style, implementing icons and visual elements to enhance readability and convey essential information such as personal projects to users with ease.

Soundwave Analysis Program

Oct 2023

- Implemented Java program to analyse soundwaves supporting wave operations of superimposition and transformation.
- Deployed a Discrete Fourier Transform (DFT) algorithm using complex numbers to apply low, high, and band pass filters on wave signals.
- Implemented partitioning algorithm to group audio clips by similarity, processing both MP3 and WAV file types.

INTERESTS & LANGUAGES

Interests: Automation | Football (Barcelona Fan) | Journaling | Swimming | Violin | Sunset Watching | Formula One

Languages: Native English speaker | Native Hindi speaker | Proficient French speaker
